

## Non-Water Soluble Machining Cutting Oil

### Next Generation and New Standard

Major breakthrough in friction reduction and cutting performance and finish for titanium, stainless steel and all other hard and soft metals.

Saves money (great ROI), reduces heat, noise and is operator and environmentally friendly.

TVT Green is a “game changer”! This advanced non-water soluble machining cutting oil differentiates itself from the competition because it is actually a lubricant that treats metals. Mono Molecular Adhesion (MMA) technology penetrates metal surfaces and bonds chemically on a microscopic level to smooth out points of contact, which drops friction by up to 80%. Decreased friction and heat are noticeable almost immediately.

Within minutes a seasoned machinist will hear that the grinding and cutting sounds have been dramatically reduced and see that cuts are of a much finer quality and without burrs. Because machines cut and drill faster, and tooling life is greatly extended up to 1500%, productivity and profitability also increase.

**Cost Savings** - Longer Tool Life, Reduced Labor Costs, Less Downtime, Improved Throughput, Less Power Consumption

**Quality Improvements** - Increased Speeds and Smoother Feeds, Improved Surface Finish

**Environmentally Friendly** - Non-Corrosive, Non-Toxic

# Non-Water Soluble Machining Cutting Oil

TVT Green Non-Water Soluble Machining Cutting Oil makes the worksite healthier. TVT Green is operator and environmentally friendly, non-toxic and non-corrosive.

TVT Green Machining Cutting Oil allows standard steel drill bits to cut holes in titanium and other hard metals faster with smoother edges and greatly reduced wear.

All other softer metals will be cut and drilled more quickly with similar savings in labor and tools as well as with improved surface finish.

**CNC Machinist:** *"We know TVT Green works, we have been using it for years to machine titanium, stainless steel, heat treated steel and all other hard and soft metals for more efficient operation and higher quality production."*

TVT Green Products are the "Next Generation and New Standard" in friction reduction technology. Manufacturing higher end finished products with reduced costs, means higher return on investment!

## TVT Green Lubricants and Protectors include:

- Engine Oil Additive
- Diesel Fuel Additive
- Gear Lubricant Additive
- Hydraulic Fluid Additive
- Water Soluble Machining Cutting Additive
- Machining Cutting Oil
- Cold Heading Lubricant
- Heavy Density Oil Well Drilling Additive
- Water Soluble Oil Well Drilling Additive
